

THE 2026 PUBLIC-SECTOR REVENUE PLAYBOOK

The record is not the opportunity.

A 7-step method for turning public evidence into one defensible next action.

SOURCE -> DECISION

Free field guide + qualification scorecard

STEP 1 / TRANSLATE

Define the company before you search.

A useful scan starts with what the business sells, who uses it, where it can deliver, and what is not a fit.

OFFER

What is sold?

BUYER

Who controls it?

CONSTRAINTS

What blocks access?

USE CASE

What changes?

GEOGRAPHY

Where can it deliver?

NOT A FIT

What should be rejected?

STEP 2 / SEARCH BY PURPOSE

Each source answers a different question.

Use the record type to decide what it can prove. Do not promote every result into active pipeline.

NOTICES	Current buying stage
AWARDS	Incumbents + recipients
FORECASTS	Possible future demand
RULES	Policy + compliance signals

STEP 3 / LABEL STATUS

Preserve the record's actual status.

A forecast is not a solicitation. An award is not an open bid. A policy signal is not a purchase.

ACTIVE

Action supported now

EARLY DEMAND

Planning signal

HISTORICAL

Past money flow

POLICY

Demand-shaping change

ROUTE

Access evidence

RESEARCH

Context only

RELEVANT DOES NOT MEAN ACTIONABLE

STEP 4 / NAME THE TARGET

The buyer, program owner, and access point may differ.

Name the organization controlling each decision before choosing an outreach route.

Do not assume these roles sit in one organization.

STEP 5 / CHOOSE THE MOTION

Match the route to the evidence.

Direct application or agency sales are only two paths. Funded buyers, recipients, partners, and channels can matter too.

☒ Direct Apply

☒ Sell to Agency

☐ Sell to Funded Buyer

☐ Sell to Award Recipient

☒ Partner with Recipient

☒ Channel / Distributor

☐ Monitor Policy

☐ Research Only

Choose one primary motion. Keep alternatives secondary.

STEP 6 / BUILD THE PATH

Start with the official route.

Follow source instructions first. Move outward to offices, portals, recipients, or partners before person-level research.

STEP 7 / ASSIGN THE ACTION

Turn evidence into owned work.

Every retained row needs an owner, supporting evidence, due date, expected answer, and a reason to stop.

OWNER

Who moves it?

EVIDENCE

What supports it?

DUE DATE

When is the check?

EXPECTED ANSWER

What uncertainty falls?
